MICROCALCE

Micronised calcium hydrate of high purity for special uses (lime flower)

Product description

MICRO-LIME is supplied in bags on stretch pallets or in bulk trucks. Store in a cool, dry and non ventilated place. Keep packaging intact.

Supply and Storage

MICRO-LIME is supplied in bags on stretch pallets or in bulk trucks. Store in a cool, dry and non ventilated place. Keep packaging intact.

Quality & Service

A modern automated production plant ensures high productivity and a constant control over all processing stages. The quality is guaranteed by daily laboratory checking. Skilled technical staff is available to provide on-site assistance and provide any useful advice for the use.

Fields of use

The use of MICRO-LIME ranges from the chemical industry to construction, from the tanning industry to all areas of ecology and the uses which require a high degree of purity and finesse. Thanks to its high specific surface, it finds particular use in fumes and acids processing systems, in thermal incinerators, in power plants and in the ceramics and glass industry.

Technical data according to UNI EN 459-1 Standard

Classification	CL 90-S
Title	CaO + MgO \geq 90%
Title	CO ₂ < 4%
Title	S < 0,2%
Specific heap weight	< 450 kg/m ³ determined in free fall
Humidity	\leq 0,1%

Disclaimers

Do not use product as a food additive because it does not comply with the requirements of D.M. No 356/1997. Keep away from humidity.

I dati riportati si riferiscono alle prove di Controllo Qualità in condizioni ambientali normalizzate. Applicazioni pratiche di cantiere a seconda delle condizioni di esercizio possono rilevare dati sensibilmente modificati, pertanto le informazioni presenti nella Scheda hanno valore puramente indicativo in quanto l'utilizzatore deve sempre verificarne l'idoneità nell'impiego del prodotto assumendosi la responsabilità derivante dall'uso.
